**Investment Review** 

**March 2021** 

The Hereford Funds – Bin Yuan Greater China Fund (share Class L1) depreciated -6.06% for the month of March (net of fees) compared to a -6.35% return for the benchmark. At the end of March, the Sub Fund was mainly invested in the Information Technology, Consumer, and Communication Services sectors, with minimal weights in the Energy, Utilities and Real Estate sectors.

For the month, the Sub-Fund outperformed the benchmark by 29bps. In March, the positions that contributed the most to the portfolio's return were Ecovacs Robot, C&S Paper and Chaozhou Three Circle. The positions that contributed the least in the month were Bilibili, S. F. Holding and Aier Eye Hospital.

## **Manager's Commentary**

After a strong performance in 2020, Chinese equities continued to run up pre Chinese New Year driven by hot money. The market pulled back after Chinese New Year taking inflation fears and the rise of the US treasury yield as catalysts.

The selling off was very healthy for the market and also gave us an opportunity to buy stocks at better prices for the next round of capital appreciation. Our job is to make sure the business fundamentals of our stock holdings are solid.

In recent weeks, the Bin Yuan team spent most of our time on the road visiting companies. We met with senior management to discuss their long term strategy. We spoke to divisional management, and did cross checking with peers, suppliers, customers, partners and industrial experts to understand industry trends and the competitive landscape. In the past three months, the team had 86 meetings, including 46 onsite visits, 40 calls, and 22 discussions with company chairmen. Below is a snapshot of the companies we spoke with:

- 1. Most of those companies are located in the Yangtze River Delta (Shanghai, Zhejiang and Jiangsu Province) and the Guangdong/Shenzhen Big Bay Area, the two regions with the most dynamic and innovative economy activity.
- 2. They are in the medical device, semiconductor, new energy, automation and control, new materials, connectivity, and smart/intelligence sectors, etc.
- 3. We were impressed by the depth of talent at these companies. They have strong entrepreneurship, technology know how, and most importantly, the management skills and global perspective gained from overseas education and working in multinational companies. They have had a strong academic and career path and the track record to prove themselves.
- 4. They are at inflection points gaining customer acceptance as their products and services are meeting new demands and they are becoming more competitive compared to foreign players. Some also benefit from the fast development of the whole domestic supply chain.
- 5. With strong talent, capital, technology, supply chain and fast adaptive culture, they have a strong competitive advantage to be in the first batch of companies benefiting from import substitution and to move ahead of foreign peers to meet new demands.
- 6. These future potential leaders are mostly mid cap names with market capitalization below USD 5bn. They are not well known even amongst domestic investors. Most of them are not accessible via the Stock Connects, only via QFII/RQFII. Foreign ownership accounts for only a low single digit % of total outstanding shares.
- 7. Valuations are attractive with current PEs circa 20x and PEG ratios less than 1, some even below 0.7, which provides great opportunities for investors.

Bin Yuan has started to use the recently approved RQFII quota to access these opportunities for our clients. We see 5-10 times upside for those companies that are still at an early stage of a long growth cycle.
